Sri Sivani College of Engineering (SSCE) was established in the year 2006 by the highly motivated and philanthropic personalities well noted in the Srikakulam district for their commitment and concern for upliftment of education. The College recognizes the vital need to produce competent engineering professionals and techno managerial professionals for the development of country. The institution is located at 9 km. milestone away from Srikakulam. It is spread over 11.10 acres of land, with picturesque landscape providing calm learning atmosphere. The campus is eco-friendly and an ideal location for studies. The institution is permanently affiliated to JNTUK, Kakinada, approved by AICTE, New Delhi, Accredited by NAAC, Recognized by UGC under 2(f) & 12(B), ISO 9001:2015 Certified and 'A' Grade by AP Knowledge Mission.

## ABOUT SSCE

## ABOUT THE DEPARTMENT

The Department of Computer Science & Engineering of Sri Sivani College of Engineering was established in the year 2006 and playing a vital role in designing, developing maintaining software and hardware for the entire college. It has been offering full time B. Tech (CSE), M. Tech (CSE) and M. Tech (SE) courses. The Department has been advancing at a rapid pace with the acquisition of advanced facilities and dedicated teaching faculty to properly motivate and mould the students for a better and prospective tomorrow. The Department is adequately equipped with several fullfledged computer laboratories and research groups in order to enhance R & D and consultancy. The Department has MOU's with NITW, IITB and APSSDC for academic and research enrichment.

## ABOUT THE WORKSHOP

Big data and machine learning are transforming the world, and the data communication networks domain is not an exception. Network operators, practitioners and researchers have at their reach today a matchless opportunity to ride on the success of the big data wave. The complexity of today networks has dramatically increased in the last few years, making it more important and challenging to design scalable network measurement and analysis techniques and tools. AMLDB-2018 will allow researchers and practitioners to learn and share their experiences on designing and developing big data applications for networking, to discuss the open issues related to applications of machine learning into networking problems and to share new ideas and techniques for big data analysis in data communication networks. This workshop is designed to increase the understanding of various applications of machine learning and big data as well as to update with the latest techniques.

- Big networking data analysis
- Big data analysis frameworks for network monitoring data
- Machine learning and big data analytics for network management
- Big data analytics and visualization for traffic analysis
- Research challenges on machine learning and big data analytics for networking
- Applications of Machine Learning
- Current Challenging Issues in Big Data
